Advisories and named areas

Limits

- ACLED counts recorded events. Rural violence is under-reported everywhere, and more so where journalists cannot go.
- Levels summarise twelve months; a road can change within days. Current advisories and local security briefings outrank this report.
- Approximate extent drawn as a circle around a well-known location. It marks where danger is concentrated, not a line inside which it begins; the areas around it are not implied to be safe.
